

XENETECH MPU Q1E Q3D RETROFIT KIT

Want your Engraver to run from Better Softwares?
 or use a new computer? or run from XP or Vista?
 Yes? Get a Q1E Retrofit for your Xenetech MPU!

RETROFIT FEATURES

- NO Proprietary Cards in PCI
- TCP/IP or Serial Input
- 200 Job Saves within Controller
- Even run job with no computer
- Network capability
- User-friendly software
- Use Existing Stepper Motor Drivers
- Broader speed range
- Improved engraving quality
- More and better fonts & shapes
- Improved reliability
- Multiple pass, depth & dwell
- Create logos from CASmate, FlexiEngrave or EngraveLab
- Run directly from EngraveLab, CASmate, Quality, Flexi, PlotAll, EnRoute, Type3 & GravoStyle. CorelDRAW via PlotAll.
- Run existing jobs via existing Xenetech PLT export.

Engraving Area, Table Features, Touch Sensor, Spindle Speed and Chip Control all remain intact. Get rid of quarks, glitches, computer lockups, clunky pendant and the ol' shutdown "grind-itself-to-death" feature.

All of these capabilities for

\$2,500
PC RETROFIT

Not Just, Good as New; "BETTER THAN NEW!"

Has your engraver still have some life? Does old technology and proprietary software and boards have you shackled? Is spending \$6,000 on Viper upgrade not feasible? Then it's time to consider a Turbo Charge. Breathe new life into your old, yet reliable, engraver with a Quality One Engravers performance-enhancing PC Retrofit Kit.

Note: Controller board, pendant, software, enhancements are the same as used on our Quest Family of engravers.

Q1E RETROFIT KIT INCLUDES:
